

Cubex[®] Case Study Wellington Veterinary Clinic

How Cubex has impacted Pharmacy & Supply Profitability at Wellington Veterinary Clinic:

- ✔ Staff and Management have real-time visibility to all materials stocked within the clinic
- ✔ Pharmacy and supply ordering is sent automatically to suppliers, saving significant hours per week
- ✔ Inventory on hand has been drastically reduced, improving cash flow
- ✔ Controlled drugs are more tightly managed in one central location
- ✔ Better access to pharmacy and supply metrics has improved management and efficiency of the clinic

“

Before we got the Cubex cabinet we had no idea much inventory we were carrying since our practice management software didn't manage inventory well. Often we thought we were out of something and reordered it only to find it had been misplaced. At other times, we'd run out of medications and either had to borrow from a neighboring clinic or rush an order. Our inventory has dropped in the last 6 months since we've adjusted the minimums & maximums and that has resulted in improved cash flow.

— Lynn Youngblood, Business Manager | Wellington Veterinary Clinic
